

TEX-CURE

TECHNICAL DATASHEET

Product	Needlepunched nonwoven short staple fibers
Composition	Polypropylene
Main function	Protection

The Tex-Cure is a white absorbent cloth developed to ensure a more controlled ripening of horizontal concrete surfaces such as bridge decks and overpasses. The use of this product to cover concrete work during the ripening period allows obtaining a smoother and harder surface more resistant to water attacks and de-icing salt. The work thus constructed will react well to freeze-thaw cycles. The Tex-Cure meets the requirements of MTQ standard 3501.

Property	Test Method	Metric	Imperial
Physical			
Weight	ASTM D5261	300 g/m ²	8.8 oz/yd ²
Color	N/A	White	
Packaging			
Standard Width	-	3.5 m	11.5 ft
Standard length	-	100 m	327 ft

Our quality management system is certified by ISO-9001 standard. Our internal laboratory is certified by the Geosynthetic Accreditation Institute - Laboratory Accreditation Program (GAI-LAP).
