

GEO-ABSORB

PRODUCT CUT SHEET

FOR OIL ABSORPTION AND ENVIRONMENTAL PROTECTION APPLICATIONS

THE PROBLEM

THE SOLUTION

ADVANTAGES

Ensures a clean and safe **worksite** by absorbing spills from the start

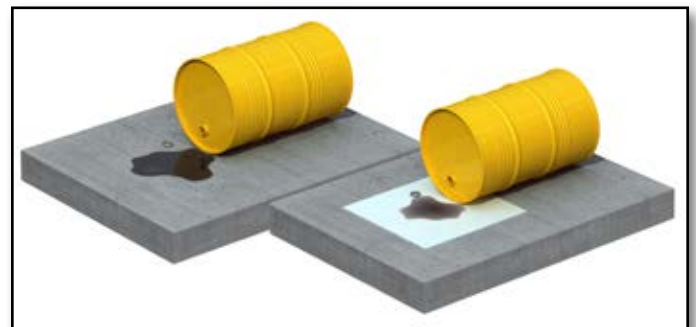

Acts as a blotter to **prevent negative impacts** of leaching into the ground

Contains spills

Mitigates environmental impact

Texel Geo-Absorb is an oil absorption product that has been tested for 10W-30 motor oil absorption. The results of these tests allow users to make the right choice to protect the environment, whether for controlling daily drips or containing a spill. Geo-Absorb's physical, mechanical and hydraulic properties have been optimized for effective protection, even on uneven surfaces.

USING GEO-ABSORB

A SOLUTION ADAPTED FOR ENVIRONMENTAL PROTECTION

- Safely absorbs up to 3 litres /m²
- Effectively contains spills right from the start
- Facilitates spill recovery
- Can easily be installed under any vehicle, barrel, forklift truck, generator, etc.
- Acts as a berm when combined with a geomembrane, allowing for a more permanent intervention

FUNCTIONS

SECTORS

- Municipal and Landscape Architecture
- Roads and Transportation
- Natural Resources and Energy
- Industrial and Waste Management

**NAME IT.
WE'LL DO IT.**

MINI BERM

- When used with a geomembrane berm, Geo-Absorb allows you to confine and easily clean up polluting products on construction work sites
- Easily adaptable to several types of work
- Customizable dimensions
- Geomembrane edges can easily be folded or reinforced at different heights

A SOLUTION FOR ENVIRONMENTAL PROTECTION

Geo-Absorb facilitates the recovery of polluting oil products. Whether it's used to control daily drips or contain a spill, this product allows for reaction time before saturation occurs. It contains spills and reduces their environmental impact, both in nature and in the workplace. Geo-Absorb's physical and mechanical properties make it a flexible product that can easily be installed even on uneven surfaces, thereby ensuring optimal protection.

Geo-Absorb allows for the safe collection and disposal of polluting products rather than having them leach into the ground. It can therefore reduce the environmental impact of a spill while ensuring a clean and safe workplace.

Geo-Absorb is an affordable and quality-controlled absorbent that is recommended for standard drips and spills. It provides a long-lasting absorption capacity to protect the work environment and ensure it remains compliant and safe. When combined with a geomembrane, Geo-Absorb can also act as a mini berm.

Mini berm with Geo-Absorb

SPEC SHEET

www.texel.ca

SPECIFICATIONS

Description	GEO-ABSORB
Product type	Needle-punched nonwoven geotextile
Format	Roll

GEO-ABSORB, properties that make a difference

- Polypropylene composition
- Highly resistant to most acids and alkali
- Mildew-resistant
- Durable and tension-resistant with a high tear strength

This table presents a summary of specifications. We invite you to consult updated information sheets and detailed technical specifications on our website at www.texel.ca.

IMPORTANT NOTICE - The information included in this document is presented for status and promotion purposes only. Therefore, all the characteristics of the project have not been mentioned. Texel and his partners do not offer any guarantee in regards of the previous information.
